

Workday API Connections

HR / Benefits Technology Integration

Reliance Matrix and Workday® utilize Matrixlink™, a purpose-built data integration platform designed to transform employer and employee experience activities into data that communicates through modern connections.

Reliance Matrix is a proud member of the **Workday Software Alliance**, enabling informed development and thorough testing of client integrations within the Workday HCM.

Advanced integrations and innovative connections with Workday:

Employer Efficiency Connections

Eligibility & Enrollment API

Verification at time of claim, no need for file feeds, full record transfers or duplicate entry.

Evidence of Insurability APIs

Unified Workday enrollment experience, instant decisions and automatic status and payroll updates.

Billing & Invoicing APIs

Automated invoice generation, no need for file feeds, manual calculations or monthly reconciliation.

Portability & Conversion Interface

Automated notifications to port or convert when an employees' insurance coverage ends.

Employee Experience Connections

Absence & Disability Claim API

Synch with status, dates, hours and/or corrections as employees progress through their absence journey.

Payroll API

Synch payroll deductions and benefit calculations without manually creating or loading reports.

Timekeeping Interface

Synch time used for continuous or intermittent absences built to fit your own absence policies.

Absence Radar® API

Synch all absences into the Absence Radar® calendar to provide a true Day One projection of absences.
